

# ADHD

Forget what you think you know...

Medicated ADHD decreases the risk of drug abuse.

A person with ADHD is six times more likely to have other mental health or learning disorders.

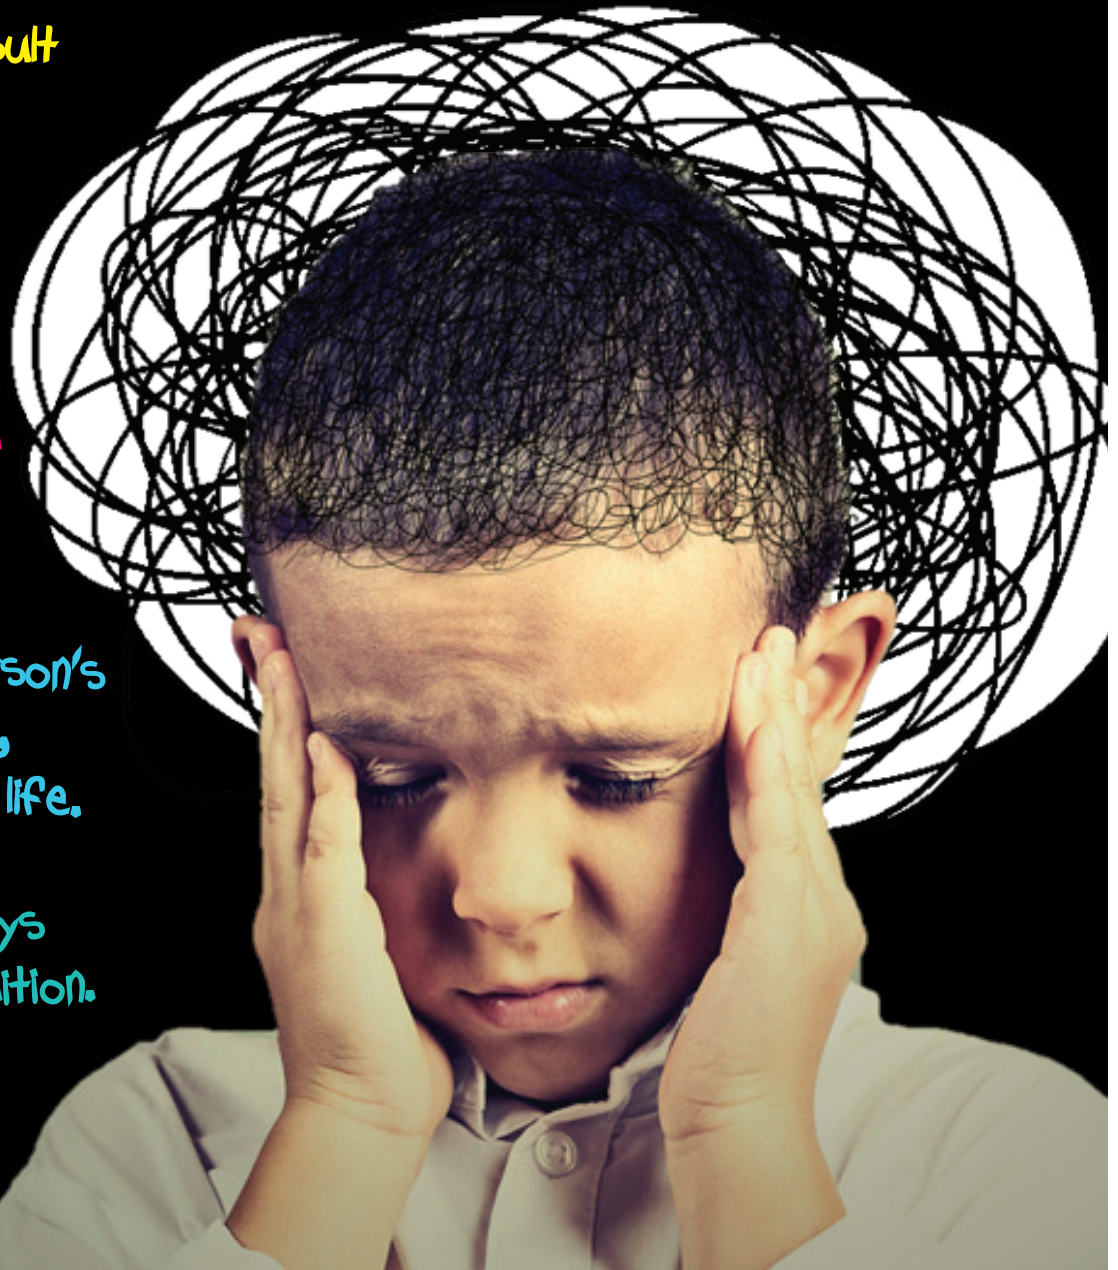

ADHD is not the result of bad Parenting.

ADHD affects both girls and boys.

ADHD is a brain-based disorder. It is real.

Untreated ADHD can severely impair a person's family life, education, work life, and social life.

Children do not always outgrow their condition.
